

We thank you for being a valued Golden Oasis customer and anticipate you will experience the remarkable benefits of this product and join the millions that are now finding relief with the powerful actions of phyto-cannabinoids.

We invite you to review recommendations on the use of this product, compiled from Clinicians, Researchers and customer feedback. While everyone's Endocannabinoid system is generally the same, the actual state of its healthy functioning, or cellular signaling, can exhibit tremendous differences between people:

- Is there a deficiency in ECS signaling or Clinical Endocannabinoid Deficiency (C.E.D.)?
- Is this an acute or chronic condition; present how long ... months, years, decades ?
- What is the cause of C.E.D. ? Long term effects of bad dietary habits, antibiotics & hormone injected foods, medications, pollutants, tobacco use, chemical & pesticide exposure may all contribute to an ECS signaling deficiency over time.

These systemic differences in people will affect the actions of cannabinoids and how this product works for you. Sometimes a distinct benefit is noticed within a few days, but more commonly, subtle actions and benefits become more apparent over time as your Endocannabinoid System regains improved functioning. The awareness of a subtle steady action can be like "trying to watch the grass grow". It is happening... just difficult to measure and elusive to recognize on a short-term basis.

✓ As with many natural therapeutic treatments, an initial "load" period followed by a "rest" or readjusting period is considered a preferred manner of administration. We recommend an initial ON period of 30 days, followed by a 7 day OFF period. Repeat this 3 - 4 week ON, 1 week OFF cycle, adjusting as recognized benefits develop.

✓ For additional efficacy, puncture the capsule and hold the oil under your tongue for 1-2 minutes. Your body will absorb up to two times the amount of cannabinoids & terpenes via sublingual administration vs. through your digestive system.
Note: The taste of these natural extracts may be quite strong !

To Your Good Health!
